

Truth Shield Advanced

The deeper-investigation tier of Truth Shield

Truth Shield Advanced

The advanced analysis tier for deeper investigation

Open Feed Network, Inc. · candortrustandsafety.com *Every claim below maps to a dated behavioral proof in the public evidence record.*

The problem

Some claims can't be resolved by a fast first-pass read — a journalist chasing a story, or a moderator facing a coordinated campaign, needs more than a label. They need the trail of reasoning, the source assessment, and the context that lets a human make the call.

What Truth Shield Advanced does

Advanced is the deeper-investigation tier built on the open-source Truth Shield core. It extends the same reasoning-shown philosophy with fuller source assessment and investigative context, aimed at professional users rather than at labeling a live feed. It pairs naturally with Tips to give journalists verification intelligence alongside the documents they receive.

How it works, in principle

Where the base tier returns a fast, transparent label, Advanced performs a deeper credibility assessment and presents the supporting reasoning and source evaluation for a human to weigh. It informs a decision; it never makes one. *Implementation and tuning are not published.*

Honest limitations

Advanced surfaces deeper reasoning for human investigators — it does not adjudicate truth, and it is a tool for professional judgment, not a replacement for it.
